

OPERATION MANAGEMENT

PRODUCTION/OPERATION PLANNING AND CONTROL

Durasi: **3 hari** (24 jam) | Duration: **3 days** (24 hours)

Menjawab Masalah Apa

Seiring dengan perkembangan jaman, tuntutan untuk memenangkan persaingan pada setiap organisasi pun meningkat. Demikian pula untuk perusahaan manufaktur dimana efisiensi dan efektifitas proses produksi merupakan indikator kinerja yang menunjang keberhasilan organisasi dalam peta persaingannya.

Guna mencapai sasaran kinerja produksi tersebut, faktor perencanaan produksi menjadi faktor penting yang harus diperhatikan, terutama bagi pelaku proses produksi itu sendiri. Ada beberapa pengetahuan dan kemampuan teknis penting yang wajib dimiliki oleh seorang perencana produksi, misalnya:

- Sampai dimana ruang lingkup Perencanaan dan Pengendalian Produksi?
- Bagaimana meramalkan jumlah permintaan produk di masa depan?
- Bagaimana langkah-langkah merencanakan produksi?
- Bagaimana menghitung anggaran produksi yang telah direncanakan?
- Bagaimana mengendalikan aktivitas produksi?

Sebagian besar dari pertanyaan-pertanyaan di atas dapat dijawab dalam pelatihan ini.

Manfaat Apa yang Anda Peroleh

Setelah mengikuti program pelatihan ini, peserta mampu:

- Melakukan proses peramalan permintaan secara sederhana
- Menjelaskan proses perencanaan produksi sesuai dengan Master Production Schedule
- Mampu menyusun rencana pengendalian produksi

Problems to Be Addressed

In line with the development of society and business, the demand to succeed in the competition, for any organization, is increasing. As is the nature of manufacture company, whereas efficiency and being effective in the production process, counts as a performance indicator that supports organization effort to succeed in its competition battle.

In order to achieve this targeted performance production, production plan is considered as an important factor to be monitored, especially for individuals who are taking care of the production process. There are several knowledge and important technical ability that are important to be maintained in a production plan, such as:

- *What are the scope of Production and Controlling?*
- *How to predict the numbers of product demand in the future?*
- *What are steps to plan the production?*
- *How to count production budget that has been planned?*
- *How to control production activity?*

Questions that were raised as above will be answered in this course program.

Objectives

After taking this training program, the participants will be able to:

- *Perform forecasting process*
- *Explain production plan process as conformed to Master Production Schedule*
- *Conceive production control plan*

Apa Saja yang Dibahas

- Peramalan Permintaan
- Perencanaan Produksi
- Perencanaan Kebutuhan Material dan Kapasitas
- Anggaran Produksi
- Pengendalian Aktivitas Produksi

Siapa Yang Perlu Ikut

Karyawan pada posisi Supervisor dan Manajer yang memiliki tanggung jawab pada proses produksi.

Subjects Covered

- *Demand forecasting*
- *Production Plan*
- *Material needs and Capacity plan*
- *Production Budget*
- *Control of Production Activity*

Who Should Attend

Employees in Supervisor and Manager level that have responsibility for the production process

IDR 5.800.000
